Dear Friend of the Bicentennial in Montana:

This third edition of the Register constitutes a departure in format and function from our previous publications in that it plays a dual role. While it is still a catalogue, and indeed, a much updated one, of the 2,700 Montana Bicentennial projects and events recorded on BIMONT, it also serves as a useful directory to upcoming activities. It is thus of invaluable assistance to news media, chambers of commerce, and travel organizations in directing residents and tourists alike to Bicentennial events throughout the state. As nearly every community in the state, along with several hundred clubs and organizations, is observing the 200th anniversary in one way or another, it is obvious that grassroots interest, be it patriotic, analytic, or critical, is high. It is hoped that this Register will be used by newspaper editors, radio broadcasters, and county Bicentennial Committees to direct Montanans to activities in which they are concerned or would like to become involved.

We of the Bicentennial Administration are gratified to put forth this compilation - its scale befits Montanans' interest and dedication, and its utility to them is similarly commensurate. Because we are notified daily of new projects and events, this Register is by no means complete. A final publication will be made in the fall of '76.

Meanwhile, I'd like to express my delight with the statewide involvement in the Bicentennial, and my wishes for the success of your ventures in this milestone year. It's been a pleasure working with the best people to be found anywhere.

Yours in the "Spirit of '76",

Harold G. Stearns

Director, Montana Bicentennial Administration

DISCLAIMER: While Bicentennial activities catalogued in this Register have been recognized by ARBA or the MBA or by County Bicentennial organizations, inclusion within this publication does not imply official recognition. The MBA uses its best efforts to verify the information supplied, but disclaims responsibility for its completeness or accuracy. PURPOSE & USE OF THE REGISTER

The April '76 Register is a catalogue of all Bicentennial-related activities which Montanans have undertaken since they first started to prepare for the nation's 200th anniversary in 1973. It serves not only as a record of completed projects and events, but also as a guide to activities scheduled to take place in 1976. As such, it provides useful information to news media, chambers of commerce, and travel organizations on upcoming Bicentennial observations throughout the state. Publicizing the state's several hundred Bicentennial activities slated for 1976 is the chief purpose of this book.

The Register provides detailed information on all Montana Bicentennial projects and events entered on the BIMONT Calendar System to date. The information is retrievable by three separate cross-references: 1) by Subject, 2) by Start Date, and 3) by County, City, Start Date.

The Detailed Information Report reflects project/event BIMONT #, title, location, description, status, theme, geographic scope, subject, method of presentation, group emphasis, contact person, and start/stop dates.

-- To obtain information on a project/event pertaining to a particular subject, turn to the Report by Subject and select from the list of 44 subject categories. Then look for the list of projects/events under this subject category in the report. Each project/event has a BIMONT #. These refer you to the Detailed Information Report which is ordered chronologically by BIMONT #.

-- To obtain information on what projects/events **(p/e)** are occurring on particular date, turn to the Report by Start Date which lists p/e chronologically by start date. Next to the date selected is the p/e completion date, the BIMONT #, title of the p/e, and the city in which it's located. Using the BIMONT #, refer back to the Detailed Information Report.

-- To obtain information on what projects/events are occurring in a particular area, turn to the map of Montana counties and determine the name(s) of the county(ies) in this area. Under the selected county in the Report by County (alphabetized by county), you'll find a listing, by city/town, of the p/e taking place, and the dates of their occurrence. The BIMONT #, again, refers you to the Detailed Information Report.
